# Dedication

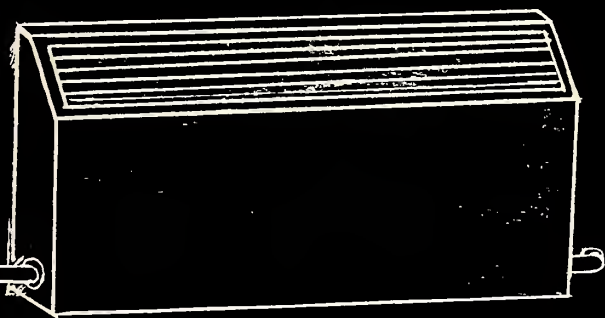

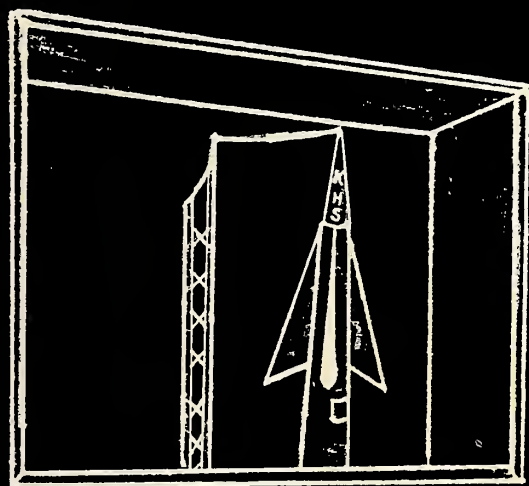

Through your gracious hospitality your home has been our rendezvous—Through your sympathetic guidance our problems have been solved—Through your enthusiastic interest many of our ambitions have been realized—Through your genuine dedication to us and our welfare you have always gone the second mile in our behalf.

Because of all of these and more, we proudly dedicate this book to you—MRS. MOSER.

# ADMINISTRATION

Our administration and faculty are the engineers assigned to Operation Education. The classroom is the launching pad from which we, the students, shall arise on our journey into the future. The chalk and board, the pencil and paper, and the textbook constitute the technical apparatuses. The examination, roll book, and record sheet furnish data for the count down. Words and ideas are the propellants which will send us on our way as we each seek our own individual orbits.

# The Class of '59

In his eternal search for knowledge and truth, man has begun his exploration of outer space. Perhaps in our own lifetime, man himself may journey in the great unknown beyond the earth's atmosphere. As we, the senior class of 1959, approach the end of our high school days, we too face a great unknown—the future. As we prepare for our journey, we experience some of the same feelings of anticipation, suspense, and awe that will confront the first space man as he prepares for his journey. Thus we choose for the 1959 EAGLE our theme—Outer Space.

# SENIORS

The count-down has been completed; the launching has taken place. The world of study and preparation will soon fade far away into the past as we, now in our final stage, continue on our way to find our orbit. The universe of the future awaits us, the Senior Class of 1959. It is ours to explore and to conquer.

one enemy and see him  
everywhere.

JO CRANFORD

If I have faltered more or  
less, it's just my search for  
happiness.

## Seniors

The time God allots to each

# SPORTS

In the great undertakings and tremendous achievements of the modern age, teamwork is essential. The highly technical and complex nature of man's future accomplishments will be too great for individuals to achieve. Such projects will call for the blending of many talents and the harmony of many minds. Perhaps nothing in our education prepares us for the necessity of cooperation and team work as does our athletic program.
